# *Look to Learn: Scenes and Sounds*

Entertaining activities for starting out with eye gaze technologies.

Look to Learn: Scenes and Sounds is a collection of 26 activities designed for children and adults starting out with eye gaze. Available as an expansion pack for Look to Learn, this software focuses on interactive scenes, music and sound, as well as eye gaze skills activities.

As with the original **Look to Learn**, each activity is designed to develop a different skill required for eye gaze access. With customizable content and a built-in analysis tool, you will soon discover the true potential of the user.

Look to Learn and Look to Learn: Scenes and Sounds can be downloaded together for trial and purchases.
Also, Look to Learn: Scenes and Sounds has its own manual. Preview and print a low resolution version from our web site under Eye Gaze Communication and Training sections.

Three new areas of learning

There are three new categories of activity in the software that have been carefully designed to further develop eye gaze skills. The new activities have been tried and tested with hundreds of users before they have been released to make sure they are fun and motivating!

Look to Learn: Scenes and Sounds also introduces 'dwell clicking'. This is where the user fixates their gaze on a point on-screen to make a selection and is a key skill for accessing The Grid 2 with eye gaze.

Interactive Visual Scenes

Each of the interactive visual scenes is designed to be fun and engaging to teach and illustrate an understanding of cause and effect. Each scene contains a range of targets each designed to have a unique reaction, helping the user explore and engage with the whole screen. Interactive visual scenes also provide a useful tool for making cognitive assessments as you can see if the user responds appropriately to instruction.

Here are a few ways in which you could use the visual scenes:

What is the bird doing?

Look at these lovely apples!

Can you see the girl in the blue shirt?

Watch the frog, what happens?

Sounds and Music

The sound and music activities provide a variety of content that enable the user to perform as well as listen. From playing the simple drum kit, guitar and xylophone to listening to the Happy Birds, there is something for all levels of eye gaze ability.

Eye Gaze Skills

Designed to help improve eye gaze accuracy, these activities focus on targeting, dwell-clicking, and exploring the screen. From controlling a race car as it zooms around a track, or popping balloons, each activity fine tunes the user's focus on the target and the resultant action.

Assessment and Analysis

Look to Learn: Scenes and Sounds has been created in conjunction with teachers and therapists with a focus on the need for real evidence of the ability of a user. The analysis tool creates a heat map to show where the user has looked on the screen during an activity, giving *visual evidence* of his or her *accuracy* in targeting. Heat maps can be saved, printed and used to measure progress and record successes. The option to customize some of the content maximizes the engagement with the user by personalizing the content individually.

Look to Learn eye gaze training software for PC

The 40 Look to Learn activities have been split into five key areas of learning and development:

- **Sensory**   Teaches cause and effect
- **Explore**   Encourages engagement with the whole screen
- **Target**   Helps improve accuracy of eye gaze access
- **Choose**   Develops choice making skills
- **Control**   Improves eye control
