

Servus 11-Z ECU Controller

Sensory Software International Ltd

Take complete control of your world

The Controller

The **Servus 11-Z** Environment Control system consists of a small tablet computer running The Grid 2 software, with a BackBox that contains the environment controllers, a control switch interface, a radio switch receiver, and a USB port for the connection of alternative input devices.

Control Everything

The **Servus 11-Z** connects to a range of accessories using the built-in controllers:

- A GEWA infra-red controller can learn the signals from virtually any remote control like those for TV's, DVD's, cable boxes, and stereos.
- Z-Wave radio control is used for some devices like power outlets that simply plug in to an existing wall socket, and can be turned on and off by radio signal. Z-Wave can also be used to control a range of alarms.

Access Options

Choose the best input method for you. The **Servus** tablet can be controlled by touch, switches (with a wireless switch option), voice input, eye gaze, head tracking, mouse, joystick, or any other USB input device.

The **Servus** tablet comes with a camera screw mount which works with quick release desk and floor mounts. For wheelchair mounting, we can supply the device with a mounting plate for either the Daessy or REHAdapt mounting systems.

Setting up the **Servus** is very easy, and we can provide remote support to help you to configure the system. We can also help you with accessories like power outlets, infrared receiving phones, and accessible elevator systems.

Servus grid sets are pre-made with the options that most people would need for an environment control system. They are fully customizable and can be

changed to suit the needs of the individual. Simply add a new appliance like a television and store the infrared signals in the internal database.

Specifications of the Servus 11-Z tablet:

Display:	Dynamic 10.8" HD (1920x1080) multi-touch/capacitive TFT-LCD with Corning® Gorilla® Glass
Hardware:	Intel Atom Z3770
Operating System:	Windows 8 (64-bit)
Software:	The Grid 2 AAC, OSK, and ECU program
Access:	Touchscreen, switch, and USB input
Switch access:	2x3.5mm jacks, radio switches (radio transmitter optional)
Connectivity:	Wi-Fi, Bluetooth, USB
Ports:	1xUSB, speaker out, SD slot
Buttons:	Power; screen rotate, home, volume
ECU:	Servus BackBox with GEWA IR and Z-Wave RF
Weight:	2.1 lbs. (1.5 kg)
Battery Life:	up to 8 hours
